ABSTRACTED-PUB-NO: JP 61231274A

BASIC-ABSTRACT:

White cloth consists mainly of polyester fibre contg. 0.8-1.8 mol% of sulphoisophthalic acid component and having affinity for cationic dye contg. at least 0.1% owf aromatic polyester-polyether cpd. The fibre has a W-shaped cross section. Specifically, the fibre is dyed with 0.5-2% owf of cationic fluorescent whitening dye at 100-140 deg.C for 5-60 mins. The sulphosiophthalic acid components are, e.g. 5-sodium sulphoisophthalate and lower alkyl ester and ethylene glycol ester thereof. The cloth includes woven, knitted and nonwoven fabrics. The aromatic polyester polyether cpds. are e.g. polyester of terephthalic (isophthalic) acid and polyalkylene glycol, copolymers thereof and block copolymer of the polyester and polyalkylene glycol.

ADVANTAGE - The white cloth has high degree of whiteness and good opacity.
